

# INTERVIEW PREPARATION

90-minute or half-day interactive  
INTERVIEW & TEAMWORK-BASED  
workshops for children (ages 7 to 14)

## An interactive and engaging practical-based workshop.

Starting with the concept of independence, pupils will reflect on the different styles of leadership, how each of them can find their leadership 'voice' within a group and how to recognise the skills and potential of fellow team-members.

How to listen-actively to others and recognise opportunities for deeper engagement.

## CONSULTANCY

**Adaptable support** for a wider variety of needs.

**Giles Delaney** has over 25 years experience in primary and preparatory school education and 16 of these spent in headship. Giles has vast experience of secondary school applications and preparation, including 11+ ISEB pre-assessments to leading public schools and 11+ tests to grammar schools.

He holds a Masters degree from Oxford University, having researched extensively into pupil identity and risk-taking up to and including adolescence and is passionate about pupils' personal growth.

## HOLIDAY COURSES

**Enjoyable, purposeful** and high-quality holiday courses for stimulated children.

Our belief is that a child's school holidays are an opportunity for them to relax and develop new levels of independence in an environment of enquiry and contextualised learning. Understanding the world around them, how and why things work and how their lives of influenced are all enormously important parts of their maturing. Our holiday courses combine all of the above and in small groups, your sons and daughters will enjoy a stimulating and hugely enjoyable period which, in subtle ways, will prepare them well for their new term.

Courses are also planned with the needs of working parents in mind. Normal days run from 8.30am to 6.00pm with extended days also possible when required. Some days are longer to accommodate longer-distance trips but will generally not extend beyond 7.30pm.

Contact us for further details.

## STUDY SKILLS FOR PUPILS

**Independence** is the key to lasting academic success.

### Neuro Science

It is very important for a child to understand how their brain works: how they process, organise and remember information.

### Organisation

Many children have multiple interests and commitments. How to 'stay on track', plan their time, prioritise tasks and foresee and avoid moments of pressure. A session on independence is also included.

### Multiple Strategies

Children work in a wide variety of ways. It is important that they find and understand which approaches give them the best outcomes.

### A Parent: (Anon.)

"Mr Delaney is so wonderful. I can't tell you how much support he has provided"

### A Parent: (Mr S. Brar)

I highly recommend Giles Delaney to any parent who is seeking professional support around the subject of private schooling. We experienced his inspirational teaching style and unique ability to connect with children first hand. He was a wonderful role model for our son and is fondly remembered.
